

Ukraine Prayer Update – Wednesday, March 23, 2022 – Day 28

Praise Points – Highlights

- **US** - Biden and the state department have fundamental changes in language, using key words to that justify military action. Additional sanctions have been announced to go into affect against all the Duma (Russian congress members) and others.
- **Poland's** president @AndrzejDuda after the meeting with Bulgarian president: Russian leadership behaves in Ukraine like Hitler, like the SS during the World War 2 in Poland. These are unprecedented massacres
- **No Air Superiority** - Nearly a month into the fighting, one of the biggest surprises of the war in Ukraine is Russia's failure to defeat the Ukrainian air force. Military analysts had expected Russian forces to quickly destroy or paralyze Ukraine's air defenses and military aircraft, yet neither has happened. Instead, "Top Gun"-style aerial dogfights, rare in modern warfare, are now raging above the country. "Every time when I fly, it's for a real fight," said Andriy, who is 25 and has flown 10 missions in the war. "In every fight with Russian jets, there is no equality. They always have five times more" planes in the air. The Ukrainian air force is operating in near total secrecy. Its fighter jets can fly from air strips in western Ukraine, airports that have been bombed yet retain enough runway for takeoffs or landings — or even from highways, analysts say. They are vastly outnumbered: Russia is believed to fly about 200 sorties per day while Ukraine flies five to 10. He said Ukraine now has roughly 55 operational fighter jets, a number that is dwindling from shoot-downs and mechanical failures, as Ukrainian pilots are "stressing them to max performance." Versus 1400 of Russia.
- **Slovakia and Poland** have considered sending MiG-29 fighter jets, which Ukrainian pilots could fly with minimal additional training, but as yet no transfers have been made. Deptula said transferring these jets into Ukraine is critical. "Without resupply," he said, "they will run out of airplanes before they run out of pilots." One suggestion is to give the planes as spare parts rather than whole planes so that Ukraine can keep their limited air force operational.
- **Russian Military** –
 - **Depleted** - "The Russians may be slightly below a 90% level of assessed available combat power," a senior defense official told reporters in Washington, adding that some Russian forces were suffering from frostbite. (10% would be 19,000+ incapacitated by death or injury.)
 - **Lack of Supplies** -The Ukrainian military has released its operational report as of 6am this morning, claiming Russian forces have stockpiles of ammunition and food that will last for "no more than three days".
- **Russian Economy**
 - **Shortages** - Sugar shortages across Russia are creating flashbacks to the Soviet Union for people where people are having to wait in lines for sometimes hours & only allowed to buy 5kg at a time. Russian doctors are facing shortages of more than 80 medicines at pharmacies, including insulin and a popular children's anti-inflammation medicine. Natalia Zubarevich, an expert on the economy of Russia's regions, noted that the main reason for the recent shortages was not just the damage from sanctions but also the failure of supply chains and hesitancy to make big purchases while the value of the rouble remains so volatile. In the longer term, entire sectors of the Russian economy could be at risk, as the lack of access to western component parts could affect everything from air travel to production of consumer goods. Economic growth is sacrificed for the sake of this wartime economy.
- **Understanding** - Speaking to the Italian parliament, Italian prime minister Mario Draghi said Russian President Vladimir Putin did not appear to be interested in agreeing a ceasefire that could allow negotiations to end the conflict to succeed.
- **Estonia** is calling for NATO to abandon its current "tripwire" posture in eastern Europe and build up a permanent force in the region capable of stopping a Russian offensive
- **External Observer** - "This long, dark march to war was obvious, the path to conflict lit by the many pronouncements emanating from the dark red walls of Vladimir Putin's palace. We reported the inevitability of conflict in detail, regularly and with the despair of Cassandra. The evidence of Putin's chosen path was never concealed. His many declarations were meant to be heard and understood. - Carl Scott, former UK defense attaché to Moscow.
- **Evacuation** - An agreement has been reached to try to evacuate civilians trapped in Ukrainian towns and cities through nine "humanitarian corridors", but no agreement had been reached with Russia to establish a safe corridor from the heart of Mariupol.
- **First Cease Fire** - The governor of the Luhansk region in eastern Ukraine said agreement had been reached on a local ceasefire to evacuate civilians trapped by fighting.
- **Russia's Reinforcements** - Russia has resorted to recruiting former soldiers to join its war effort in order to make up for heavy losses.
- **Rebuilding** - The EU prepared to set up a "trust fund" aimed at helping Kyiv repel the invasion and rebuild afterwards.
- **EU Membership** - Commissioner for Neighbourhood and Enlargement Oliver Varhelyi: At EU Foreign Ministers meeting FAC for @EU_Commission today: EU continues to stand by Ukraine & its people, delivering assistance. And we started working on delivering an opinion on the basis of the application for membership for Ukraine. We will work as fast as we can.
- **Ukraine**
 - **Pushback** – Russian forces pushed back in Northwest Kiev, out of Mukachev, while forces in Bucha, Irpin and Hostomel are surrounded.
 - **Talks** – Ukrainian president Volodymyr Zelenskiy has called for direct talks with his Russian counterpart as the key to ending the war. Talks tough and even confrontational but claims there is some progress.
 - **Refugees** - Over 3.5 million Ukrainians have now fled the country – UNHCR

Russian forces stop moving during the night and typically hide their tanks in between houses in villages where conventional artillery cannot strike them, Yaroslav Honchar, the unit commander based in Kyiv. "We strike at night, when Russians sleep," Honchar told the paper. "In the night it's impossible to see our drones." "We look specifically for the most valuable truck in the convoy and then we hit it precisely and we can do it really well with very low collateral damage. Even in the villages, it's possible. You can get much closer at night," he said.
